EXPERIENCE

HEAD FRONTEND ENGINEER & PRODUCT MANAGER

INTERESTING DEVELOPMENTS, LLC (SOLE PROPRIETOR) | FULLY REMOTE | 2022 - PRESENT

CONSULTANCY | CLIENT: PLUTUS DAO

- 7th employee hired, working closely with the product team to bring the dApp from idea to release, allowing users to interact with our smart contracts.
- Deploying easily scalable and maintainable code daily, while participating in product management, code and design reviews, and regular retros post release.
- Rapidly expanding the work of our founding developers by ticketing, implementing and refining features based on twitter and discord community feedback, resulting in over \$5M market cap and \$1 token value.

SOFTWARE ENGINEER & PRODUCT MANAGER

TRUSTED CREATIVE | FULLY REMOTE | 2020 - 2022

Initially contracted for a single product release, retained and promoted to SDE. Implemented agile development process, acting as product manager and leading a cross-functional team throughout the lifecycle of 9 different products for 2 of the company's most strategic clients. Translating client requirements into actionable tickets, tasks, user stories, and ultimately deliverables.

- Key architectural decision maker managing database and server management.
- Lead research, presentation, and adoption of more modern frameworks and platforms to meet business needs while enhancing performance and efficiency.
- Managed Zendesk ticketing to triage and prioritize customer needs.
- Managed a team of 5 student interns through remote training, creation of robust documentation, and imbuing best practices at all levels.
- Google Analytics, Data Reporting, and JavaScript SME.

LEAD FRONTEND ENGINEER

KEEPER AI | BELLEVUE, WA & REMOTE | 2019 - 2020

Lead Frontend Developer and React.js subject matter expert. I worked directly with our product manager, designers, UX researchers, and our sales team to make key product and UI/UX decisions throughout the product life cycle.

- Agile, quick-iteration development environment, shipping code daily while working with a product in flux to anticipate and meet stakeholder needs.
- Developed features and updates on front and back-end based on internal and vendor usability data.
- Primary frontend SME (React.js, TypeScript/JavaScript, SCSS).

PROJECTS

PLUTUS DAO dApp

plutusdao.io | 2022

Role: Working in a cross-functional team with the design director, head engineer, and business development team to take Plutus DAO from pre-launch to release at a \$5M market cap. I acted as frontend engineer and product manager.

Product: Plutus DAO is an Arbitrum-native governance aggregator aiming to maximize users' liquidity and rewards while simultaneously aggregating governance behind the PLS token. Plutus' objective is to become the de-facto Layer 2 governance blackhole for projects with veTokens.

Languages & tools used: TypeScript, HTML/CSS, Web3.js, Next.js, Ethers.js, Sentry, React.js, GraphQL, Chakra UI, Git, GitHub Orgs, Vercel.

JOURNEYS COUNSELING WEB APPLICATION

journeycounseling.com | 2021

Role: Managed onboarding, email server migration, SSO, and FTP setup for 50+ professionals within the organization. Responsible for database architecture and integration of a new "Therapist Finder," feature. Built and deployed administrative dashboards for onboarding new staff.

Languages & tools used: MSSQL, C#, HTML/CSS, AngularJS, MSSQL Server Management Studio, Remote Desktop Manager, DNN, ZenDesk, Git, BitBucket.

CONCORDIA UNIVERSITY IRVINE VIRTUAL TOUR

cui.edu/virtual-tour-ug | 2020-2021

Role: Worked in a cross-functional team with the design lead to plan, design, implement, test, and release the tour. Monitored and reported long term data.

Product: Interactive virtual tour of the CUI campus built on the Leaflet.js framework. This expansive microsite replaced the previous tour solution and has seen a traffic increase of over 25% since deployment.

Languages & tools used: Leaflet.js, JavaScript, AngularJS, jQuery, HTML/ CSS, JSON, DNN, MSSQL, Git, BitBucket.

KEEPER AI

keeperai.com | 2019

Role: Wore several hats, primarily lead frontend developer and intern manager.

Product: Keeper AI is a next generation HR tool used to show off the human side of potential hires. By consuming content from several APIs this enterprise level application allows candidates to use various media to show potential employers who they are at a deeper level.

Languages & tools used: TypeScript, React.js, HTML/SCSS, Jest, Node.js, NPM, Git, GitHub, Jenkins.
